SIMULATED
Asset Management

RFP response

Agent: **Client Advisory**

OPENING PROMPT

```
I need to prepare an RFP response for a pension fund that wants an ESG equity mandate.
```

The demo date is the latest price date in the Snowflake Public Data share at build time, and positions are month-end. Agents answer from live data, so figures, names and rankings in your environment can differ from the examples in this script.

Business Context Setup

Persona: James Mitchell, Client Relationship Manager at Simulated Asset Management
Business Challenge: Responding to institutional RFPs is time-intensive, requiring coordination across investment, operations, compliance, and client service teams to compile firm capabilities, track record, and team information. Traditional RFP responses take 2-3 weeks and consume significant senior resources.
Value Proposition: AI-powered RFP response preparation that gathers firm capabilities, performance data, investment process details, and compliance information to accelerate RFP turnaround from weeks to days.

Agent: `AM_client_advisory_copilot`
Data Available: Portfolio performance data, investment philosophy documents, sales templates (RFP template), compliance policies, product catalog

Demo Flow

Scene Setting: James received an RFP from a large pension fund seeking a Global ESG Equity mandate. The response is due in 10 days and he needs to prepare a comprehensive proposal.

Skill Used: `rfp-response-preparation` — triggers automatically from the initial prompt and orchestrates the full workflow.

Step 1: Initial Request (Triggers Skill)

User Input:

PROMPT

```
I need to prepare an RFP response for a pension fund that wants an ESG equity mandate.
```

Agent Behaviour (skill stopping point):

The agent activates the `rfp-response-preparation` skill and presents structured option-based questions:

1. **Which SAM ESG-aligned strategy should anchor the RFP response?**
2. **Which regulatory framework(s) should the RFP response explicitly address?**
3. **What type of pension fund is the prospective client?**
4. **Are there particular sections you want emphasised in the response?**

Recommended Demo Selections:

Question	Selection
Strategy	SAM ESG Leaders Global Equity
Regulatory framework(s)	SFDR Article 8

Question	Selection
Pension fund type	EU IORP / occupational pension
Sections to emphasise	ESG integration methodology

Presenter Transition:

> *"Notice how the agent asks exactly the right clarifying questions — strategy, regulatory framework, client type, emphasis areas. This is the skill's verification step ensuring we gather the right content. It behaves like an experienced associate would..."*

Talking Points:

- **Intelligent Clarification**: Agent identifies what it needs rather than making assumptions
- **No Wasted Effort**: Verification upfront prevents gathering irrelevant content
- **Structured Approach**: Option-based questions make it easy to specify requirements precisely

Step 2: Agent Executes Autonomously

After the user selects their options, the agent proceeds without further interruption.

Tools Used (executed autonomously by the skill):

- `portfolio_analyzer` (Cortex Analyst) - Query ESG Leaders performance, AUM, holdings
- `search_internal_docs` (Cortex Search) - RFP template, ESG investment philosophy, compliance policies
- `search_regulations` (Cortex Search) - SFDR Article 8 disclosure requirements
- Synthesis into complete RFP draft

Expected Response — Complete RFP document covering:

- **Executive Summary**: Key highlights and value proposition
- **Firm Overview**: SAM capabilities, AUM, regulatory status
- **Strategy Performance**: ESG Leaders returns vs benchmark (QTD, YTD)
- **Investment Process**: ESG integration methodology, active ownership, exclusion policy
- **Portfolio Characteristics**: Top holdings, sector allocation, ESG ratings
- **Risk Management**: Investment risk limits and monitoring approach
- **Compliance and Regulatory**: SFDR Article 8 disclosures, sustainability risk integration
- **Team and Resources**: `[TO COMPLETE]` markers for named biographies
- **Fee Proposal**: `[TO COMPLETE]` placeholder
- **Sections Requiring Manual Review**: Checklist of items needing human attention

What to expect in this environment: the draft anchors on SAM ESG Leaders Global Equity, quotes the strategy's AUM, holding count and average ESG score, and SAM's firm-wide AUM across 11 strategies. Read these out at name level ("a single-digit-billion firm, a mid-sized ESG book of about 45 holdings") rather than quoting the figures, which move with each weekly refresh.

> ***Presenter Note**: The RFP draft's headline return comes from the portfolio returns data and can show ESG Leaders roughly level with, or slightly ahead of, its benchmark YTD. The attribution data used in Client Advisory 3 shows ESG Leaders trailing its benchmark YTD. The two use different return and benchmark definitions. Do not run both scenarios back-to-back for the same audience without explaining that, and check the RFP's performance claim before it goes to a client.*

Note: The semantic model provides QTD and YTD returns. For longer-term performance (1Y, 3Y, Since Inception), the agent will note data availability limitations — this is realistic as demo data is anchored to recent market data.

Talking Points:

- **Single Prompt to Complete Draft**: One confirmation and the agent delivers a full institutional-quality RFP response
- **Multi-Source Orchestration**: Combines performance data, philosophy docs, policy docs, and regulation text seamlessly
- **Smart Placeholders**: Agent marks sections it cannot complete (fees, team bios) rather than fabricating content

- **Regulatory Precision**: SFDR requirements retrieved from actual regulation text, not internal summaries
- **Review Ready**: Draft prepared for senior review with a clear checklist of what still needs human attention

Key Features Highlighted:

- **Skill-Driven Workflow**: `rfp-response-preparation` skill orchestrates 5 internal steps autonomously
- **SAM_PORTFOLIO_VIEW**: Performance data for track record section
- **SAM_INTERNAL_DOCS**: Philosophy, templates, and policy content
- **SAM_REGULATORY_DOCS**: SFDR regulation text for ESG fund disclosure
- **Accelerated Timeline**: What took 2-3 weeks now takes minutes

Step 3: ESG Due-Diligence Evidence

Presenter Transition:

> *"The draft makes claims about our ESG integration. The pension fund's due-diligence team will want proof—our philosophy and policy backed by what we actually hold. Let me pull concrete examples from our ESG Leaders portfolio..."*

Reasoning: Philosophy and policy are important, but prospective clients want evidence of implementation. Portfolio examples provide tangible proof of ESG integration and strengthen the Investment Process and Portfolio Characteristics sections of the RFP.

User Input:

> **PROMPT**
>
> ```
> Show me examples from the SAM ESG Leaders Global Equity portfolio that demonstrate our ESG approach in practice. Include holdings with strong ESG scores and explain why they fit our criteria.
> ```

Tools Used:

- `portfolio_analyzer` (Cortex Analyst) - Query ESG Leaders portfolio holdings
- `search_internal_docs` (Cortex Search) - ESG investment philosophy and ESG policy criteria (exclusions, minimum grades, controversy thresholds) used to explain why each holding fits

Expected Response:

- **Top ESG Holdings**: the portfolio's AA-rated leaders, all comfortably above the BBB floor and the portfolio average score
- **Worked Examples**: typically Costco (the largest position, Consumer Staples) and Qualcomm and NVIDIA (Information Technology), each tied to the material ESG factors for its sector
- **Sector Examples**: ESG leaders across different sectors

> ***Presenter Caution**: Some of the highest-scored names the agent picks (Qualcomm and NVIDIA in particular) carry active High-severity environmental controversies in the Risk & Compliance ESG Controversy Review, and Costco is in concentration breach. A due-diligence team would find this. Either steer the agent to other examples, or acknowledge the controversies and the engagement in place.*
> *• **Selection Rationale**: Why these holdings exemplify ESG approach, tied back to the philosophy (integration rather than simple exclusion, materiality focus) and the specific policy criteria*
> *• **ESG Score Distribution**: Overall portfolio ESG profile*
> *• **Comparison**: How ESG focus differs from benchmark*

Talking Points:

- **Evidence-Based**: Concrete portfolio examples support philosophy claims
- **ESG Integration Proof**: Shows ESG scores alongside positions
- **Differentiation**: Demonstrates how ESG focus affects portfolio composition
- **Due Diligence Ready**: Philosophy, policy and holdings evidence combined in a form the pension fund's compliance team can review

Key Features Highlighted:

- **SAM_PORTFOLIO_VIEW**: Complete portfolio data including ESG dimensions

- **SAM_INTERNAL_DOCS**: Philosophy and policy content
- **Three-Source Integration**: Philosophy + Policy + Portfolio data combined seamlessly

Scenario Wrap-up

Business Impact Summary:

- **Time Savings**: RFP response preparation reduced from 2-3 weeks to 2-3 days
- **Consistency**: Standardised responses across all RFPs
- **Quality**: Comprehensive coverage of all RFP requirements
- **Win Rate**: Better-prepared proposals improve competitive positioning

Technical Differentiators:

- **Multi-Source Integration**: Combines performance data, philosophy, and policies seamlessly
- **Template Intelligence**: AI applies institutional RFP standards automatically
- **Due Diligence Ready**: Output meets pension fund evaluation requirements
